ESCAPE FROM HAITI

RESCUE MISSION TURNS INTO SURVIVAL DURING 2010 EARTHQUAKE.

Escape from Haiti is the true story of 20 teenagers on a mission trip to the poorest country in the Western Hemisphere, Haiti. When the earthquake of 2010 hits the island, they are cut-off from the rest of the world. Rumors of a tsunami force them into the mountains to fend of their attackers. The first night, the teens, afraid of looters and thugs, sleep on the ground in a circle of vehicles for safety. They are alarmed by the sounds coming out of the jungle, but soon realize it's the sounds of hymns being sung by the natives in the surrounding hillsides. Someone is watching over them! A likely rescue comes from a local company that picks them up in trucks to transport them out of the country. When the trucks stop unexpectedly in a remote compound, they realize it's a trap by the drug cartel to sell the teens into slavery. With all hope lost, and their backs against the wall, they do the only thing left, they pray. Miraculously, behind the scenes, a group of ex-Delta Force operatives have been commandeering helicopters in the Dominican Republic to fly across the border into the shambles of Haiti to rescue the teens. At just the right moment, the Blackhawk helicopters swoop in and fly the teens to safety.

Escape from Haiti, is the harrowing story of how God reached down and saved the lives of 20 teenagers through the heroic efforts of four modern warriors.
